Courtesy of Elite Frozen Foals we have a semen tender for a dose of semen of your choice from a list of six top stallions. A great chance to purchase a bargain for the next breeding season.

Door Prizes!!!!!!

EFF are providing all ticket holders on the day with a 10% discount on any semen purchase from their stallion catalog.

Courtesy of IHB- one \$220 discount on purchase of any semen from their range.
2 copies of "Winning Horsemanship, A Judges's Secrets and Tips for your Success" by Joanne Verikios and 2 prizes from Mitavite's fantastic products

Tickets now available: AWHV members \$22, all others \$66

Please contact: awhavic_secereg00@yahoo.com.au for bank details and for emailing of printable tickets upon proof of payment.

Cheques made payable to AWHV Ltd. Numbers are limited!

Please let me know if you have any special dietary requirements

A little more about our speakers:

Rosalind Meadmore has spent most of her life involved with horses and has competed in dressage, show jumping, showing and eventing and managed the Kelso Indoor Training Centre. With her partner Charlie Moffat, they produced and sold some exceptional horses internationally. Ros has been involved with the AWHHA for over 30 years and was one of the first colt and mare classifiers appointed. Ros has judged at AWHHA Gala Days and at the Summer Royal Show. Most recently on the AWHHA's behalf she spent 24 days at the start of 2016 couped up in a small car with Michael Schmidt, our International Assessor, on the National Assessment tour. She will tell us something of that today.

Case Wientjens began his career in Holland trading and training young horses. He moved to Australia in 1982 and in 1990 began importing frozen semen and established Flowervale Warmblood Stud in 1992, now located in Yarragon. The stud specialises in the breeding and training of dressage horses and produces dressage and jumping horses of international quality. Flowervale provides a full range of services to breeders and prospective buyers alike, including foaling down and handling and training foals and young horses. Case will discuss Dutch warmbloods and the Koninklijk Warmbloed Paardenstamboek Nederland (KWPN)

Dr John B Walker BVSc from Mitavite has worked with some of the best horses in the country including Champion Racehorses (Makybe Diva and Miss Andretti) and Olympic Gold Medalists and has more than 15 years experience in his field. He also consults interstate and overseas.

He will discuss issues surrounding diet and nutrition in relationship to OCD/DJD in foals, paying particular attention to the role of Vitamin K and insulin-sensitivity in the development of OCD.

Dr Tom Russell BVMS MACVSc Dip ECVS is an expert Equine Surgeon currently based at Bendigo Equine Hospital. He has done extensive training in equine surgery and was the Senior Surgeon at Goulburn Valley Equine Hospital for eight years. One of his specialties includes Arthroscopic (keyhole) surgery of joints and the removal of OCD fragments. He will be discussing leg issues in foals and young horses (OCD and DJD) and some critical Foaling issues.

Dr Peter Bartram BVSc Graduated in 1980 from the University of Melbourne. After a brief stint in private practice he spent 3 years at the University of California, Davis on the academic staff. He is currently in private practice in Benalla and has spent the last 20 years focusing on equine reproduction, both on TB farms and on frozen semen AI and embryo transfer in warmbloods. He will be discussing the preparation of the mare for breeding and dealing with the "problem" broodmare.

A few words about our sponsors

ELITE FROZEN FOALS

AUSTRALIA & NEW ZEALAND

Elite Frozen Foals is an equine reproduction facility located in Benalla, Victoria. They focus on importing semen from the best of the independent Stallion Stations in Germany. Dr Peter Bartram and his wife Jane regularly visit the Stallion Stations to ensure the best possible relationships for the delivery of quality semen on time. Jane and Peter select stallions that they feel will complement and improve Australian mares. The proof of their expertise can be seen in the progeny produced by their own mares at Hollands Bend Warmbloods. The Bartrams are always happy to discuss your semen choices or thoughts and to assist you in matching your mares to the best stallions based on type, temperament and breeding goals.

International Horse Breeders Pty Ltd offer many years of experience in the trade of frozen AI. IHB have a huge catalog of stallions available to Australian breeders and covering a range of equine disciplines. For dressage, jumping or eventing, have a look at the Warmblood gallery. They also offer the best of Coloured Warmbloods, Friesians, Standardbreds, Quarter Horses, Paints, Connemaras, German Riding Ponies, Pure Spanish Horses and Welsh Ponies, in short, something for nearly everybody!

In the mid 1980's, Businessman and racing enthusiast Bob Lapointe saw an opportunity to improve racehorse performance through the production of specialist equine feeds.

He built the first Mitavite feedmill on his property at Gunderman NSW. Joining forces with Sam Rutherford and later veterinary surgeon Treve Williams, the three combined to develop a feed for racehorses that "provided everything in the bag".

Today Mitavite provide a large range of "state of the art" feeds and supplements for every discipline and horse throughout its entire life from foal to geriatric.

Equilume™ was established in 2012 after Dr Barbara Anne Murphy discovered the optimum light level required to advance the breeding season in horses.

The Equilume™ Light Mask is automated and works by providing the optimal level of blue light to one of the eyes.

Benefits: Earlier conceptions, prevent prolonged gestations, increased average foal birth weights, improved coat condition, optimise stallion performance early in the season, no need for stabling so lower maintenance costs, natural horse behaviour.
