

Equine Infectious Diseases Advisory Board Vaccination protocol

HENDRA VIRUS
 The Equine Infectious Diseases Advisory Board supports the Australian Veterinary Association's position to strongly recommend that all horses in Australia are vaccinated against Hendra virus to help protect humans from its potentially fatal outcome.

NOTE: In the event that you are unsure of your horse's vaccination status, consult your vet about undertaking a Vaccination Priming Regimen
 * Priming protocol is one dose at eight, nine and ten months of pregnancy ** The Hendra virus horse vaccine has not been tested in pregnant or breeding horses
