The diagrams must be sufficiently detailed to ensure the positive identification of the animal in the future. White markings must be shown in red. If there are no markings, this fact must be stated. All head and neck whorls should be marked (X). Other whorls should be similarly recorded in grey and in animals lacking sufficient other distinguishing marks. Acquired marks and other distinguishing marks e.g. prophet's thumb mark, walleye, etc. should always be noted. If microchip implanted please mark location with an arrow.
